

2016 Creative STORAGESM CONFERENCE

June 23rd 2016 at the DoubleTree Hotel, Culver City, California

AN ENTERTAINMENT STORAGE ALLIANCESM EVENT

Tien Shiah, SSD Product Marketing Manager, Samsung Device Solutions Americas

TITLE: Can your M&E Local Storage Keep Pace with the Network?

ABSTRACT

Older data storage technologies aren't keeping pace with critical advances in networking and device interface performance. It might surprise you that network storage can outperform local direct attach storage. How fast is the storage on the other side of the network? Will the cloud displace local M&E storage for performance-critical applications?

BIOGRAPHY

Tien Shiah is a Product Marketing Manager for solid state drives at Samsung Semiconductor, Inc. In this capacity, he serves as an SSD evangelist, product consultant and market expert, focused on the accelerating migration to SSDs in the client and enterprise marketplaces. He brings more than 15 years of product marketing experience from the semiconductor and storage industries, including three years at Emulex, where he championed the use of CNA (converged network adapter) technology for network convergence within the data center. He has an MBA from McGill University (Montreal, Canada) and an Electrical Engineering degree from the University of British Columbia.
